Price

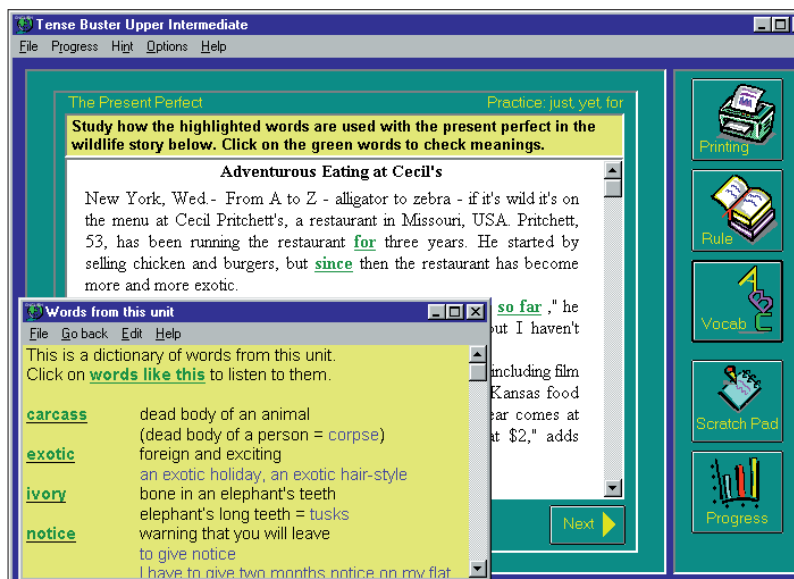

<b>1 computer per level</b>	<b>£34.95</b>
<b>Five-level bundle:</b>	<b>£99.00</b>

**UK & EU add 17.5% VAT**

## Clarity Programs

### Tense Buster

The new Windows version of this program, which now includes sound, comes in five levels, and is supplied on CD as standard with an all-diskette version also available.

The list of titles available on the left shows that *Tense Buster* goes a long way beyond verb tenses and offers a detailed and structured approach to some of the most difficult parts of English grammar. Students are given an introductory exercise to make sure they understand, then they can look at the rules, practise and test themselves. Exercises are for the most part gap-filling as above but the illustration also shows that a scratchpad (i.e. notepad) facility is available for student use and printing is also possible. Records of progress are kept and grammar rules can be consulted at any time. The program is unusual in that it also gives valuable suggestions on learning strategies and on how students can work away from the computer. *Tense Buster* is designed to be multiculturally accessible and very easy to use.

The course helps students

- understand grammar in context
- search for grammatical patterns
- produce the right target language
- proofread their own work
- think about learning strategies
- expand their vocabulary

### The Exercise Generator Plus

The *Exercise Generator Plus* enables teachers to create their own exercises in the form of paper worksheets. These are ideal for vocab activities, tests, homework and exam practice and are a fast and economical way of building up paper-based resources for a self-access centre. Each level (**Elementary, Lower Inter., Inter., Upper Inter., Advanced**) provides specially written texts that you can manipulate with nine different text and vocab exercise types but you can also paste in your own material.
