*Available with site licence only*

**Additional CD disks £10.00**

**each**

**Additional CDs (5-pack) £60.00**

## Starspell 2004

*Starspell 2001* is a low-cost CD-ROM spelling program for both home and school. It is based on the "Look-Say-Cover-Write-Check" principle, with added sound. *Starspell 2001* offers a comprehensive approach to the complexities of English spelling. Every word in the program is given a spoken context sentence.

There are extensive word-lists for each term of the Literacy Hour framework. The National Curriculum subject word-lists for Key Stages 3 and 4 are a valuable resource for subject teachers and SEN specialists. Other features include Onset and Rime lists, games, enhanced list editing and record-keeping. *Starspell 2001* can print out worksheets for further practice.

It contains over 300 lists totalling 2500 words, all spoken and many illustrated. The word lists offer a comprehensive and ordered approach to spelling English. Every word is spoken and many have pictures.

It comes with a font specially designed for young learners, but the fonts and size can be changed to those on your Windows system. Users can make changes to the programs, to cut out the displayed word, or the sound prompts, for instance. It is also authorable, so that you can add your own word lists and sound and pictures using Windows Sound Recorder and a standard Paint program.
