# TOEIC<sup>®</sup>: Alexis<sup>™</sup>

TOEIC (Test of English for International Communication) is designed to test your ability to understand English as it is used in international business and other professional settings. The TOEIC test covers two main areas: your ability to understand spoken English and your ability to read materials in English, such as correspondence, reports, advertisements, and articles.

**The following is taken from the Encomium publicity brochure:**

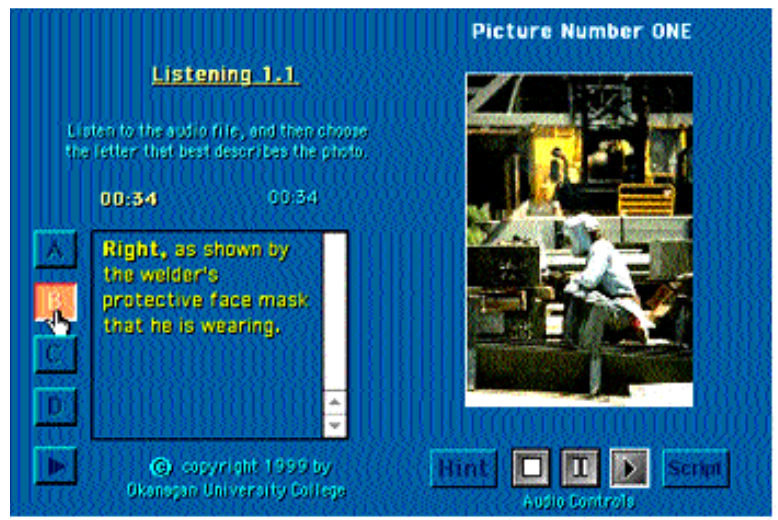

Encomium Publications' TOEIC Test Preparation System, is an all-new **Web-based** CD-ROM designed to help you improve the English communication skills you need to optimize your TOEIC scores and succeed in business. This user-friendly tool offers practical help for those desiring focused, interactive help in understanding – and being understood when using English, the international language of business.

1. Prepare for the TOEIC (Test of English for International Communication) because it:

- is ideal for a test preparation course or for self study at the intermediate to advanced levels of proficiency –TOEIC scores of 450-850
- gives you 600 exercises that help you master test-taking skills for both the Listening Comprehension and Reading sections
- provides immediate, detailed feedback for both correct and incorrect responses
- improves your time management skills with timed questions for each section of the TOEIC test.

2. Gain competency and confidence in understanding/using English in the workplace and other environments because it helps you

- interact comfortably with co-workers, clients and others in a variety of contexts/situations
- understand/use English in business overall, as well as in specific areas such as human resources, sales/marketing and purchasing
- present yourself well in meetings – as a manager, employee and/or team member
- improve your telephone and written communications skills

3. Become comfortable in dealing with formal and informal social situations that are often key to your business success.

Alexis can be used as a stand-alone CD or put on a server to be accessed by multiple users
